

Maintaining and light Renovation System

KGS Multi Speed™ single disc machine and KGS ROCKY™ polishing discs

KGS ROCKY™ Multi Speed™ Polishing System

KGS DIAMOND GROUP of Switzerland is proud to continue its tradition of quality and innovation by introducing a UNIQUE polishing system for light RENOVATION and MAINTENANCE of concrete, terrazzo and most natural stone, KGS ROCKY™.

KGS ROCKY™ was developed in combination with the KGS Multi Speed Machine, to create a system which would, through the use of varying rotational speed rather than high pressure, give the following benefits:

- Work superbly under a light machine capable of both slow rotational speeds for smoothing and high rotational speeds for final polish.
- Provide a high polish with low stock removal.
- Smooth and polish "high density" floor material – DRY.
- Give excellent lifetime performance.
- Give excellent productivity
- Reduce total job costs due to low abrasive cost per m².

KGS Multi Speed™ Single Disc Machine

The KGS Multi Speed™ Machine offers 3 speeds, 200 rpm, 400 rpm and 600 rpm plus vacuumation. This gives the user tremendous versatility in such a light and compact package. It has the capability to smooth and polish stone, terrazzo, concrete, overlays and other composite floors as well as carry out daily maintenance, buffing and burnishing.

There has never been such a flexible rotary system in this sector.

KGS 450 Multi Speed™ 17"(430mm)

Standard Equipment

Article Number	Description
8801.00039	Power 220V/50Hz/2,2kW 20kg weight Assembly 450 Centreflex Drive Board Exhauster Vacuum Attachment

Technical information	
Engine effect	2.2 kW
Power	13A
Voltage	230 V 1-phase
RPM	200 / 400 / 600
Frequency	50/60 Hz
Machine Weight	45 kg
Machine Weight + Exhauster Vacuum	51 kg
Machine Weight + Exhauster Vacuum + Weights	71 kg
Cable Length (m)	14
Noise Level (dba)	57
Noise Level with Vac (dba)	71

For the Spare Parts of the KGS 450 Multi Speed™ see article Numberpage 41.

KGS ROCKY™ Technology

Description
KGS ROCKY™ polishing discs 430x200mm (17") QRS Hook Step 1 - Grey
KGS ROCKY™ polishing discs 430x200mm (17") QRS Hook Step 2 - Orange
KGS ROCKY™ polishing discs 430x200mm (17") QRS Hook Step 3 - Black
KGS ROCKY™ polishing discs 430x200mm (17") QRS Hook Step 4 - Blue
KGS ROCKY™ polishing discs 430x200mm (17") QRS Hook Step 5 - Red
KGS ROCKY™ polishing discs 430x200mm (17") QRS Hook Step 6 - White
KGS ROCKY™ polishing discs 430x200mm (17") QRS Hook Step 7 - Yellow
KGS ROCKY™ polishing discs 430x200mm (17") QRS Hook Step 8 - Green

All discs with Ø200mm center hole.

The KGS ROCKY™ discs and KGS Multi Speed™ disc machine Deliver an unbeatable SYSTEM for maintaining and making Light renovation on most types of flooring, including concrete, terrazzo and most natural stones. The complete package is light weight, fast and easy to use. All working DRY!

Tips Use KGS Solid Spacers with KGS ROCKY™ discs for best polishing quality on smooth, level/flat floors.
For uneven or undulating floors, use a KGS Flexible Spacer for optimum results.
KGS ROCKY™ discs are polishing tools with best results on floors that are already smooth, flat and level.
